AZAM AZRI AHMAD

Yogyakarta, Indonesia

(+62)821-3407-4063 azamazrri@gmail.com linkedin.com/in/azamahmad github.com/azamazri

SUMMARY

Informatics Engineering graduate with hands-on experience in cloud-based projects, structured data handling, and data-oriented workflows. Familiar with cloud computing fundamentals, SQL databases, Python-based data processing, and reporting support. Comfortable working with structured master data, documentation, and accuracy-critical tasks in remote, process-driven environments.

EXPERIENCE

PT SRIKANDI MERCH OFFICIAL – Yogyakarta, Indonesia
WordPress Developer (April 2023 – May 2024)

- Developed an e-commerce website using WordPress with structured product and content data
- Collaborated with the management team to align website structure with business requirements
- Organized website content, product listings, and supporting information
- Followed clear project instructions and timelines to ensure accurate implementation

PRACTICUM ASSISTANT – Yogyakarta, Indonesia
Practicum Assistant in Optimization Engineering (September 2023 – February 2024)

- Prepared practicum assessments and supporting learning materials
- Delivered weekly practicum sessions based on predefined curriculum and guidelines
- Compiled practicum reports and student performance documentation
- Maintained consistency and accuracy in assessment and reporting processes

GERAKAN INFAQ BERAS – Sleman, Indonesia
Media Creative Team (May 2022 – July 2023)

- Supported content planning and organization for social media
- Assisted in basic documentation and coordination tasks

Public Relation (August 2022 – August 2023)

- Coordinated information dissemination activities to students and community members
- Documented communication activities and outreach outcomes
- Participated in structured meetings to plan and evaluate programs

Roomah – Work From Home | Full Stack Web Developer
Next.Js, Tailwind, Supabase (September 2025 – November 2025)

- Assisted in structuring user profile data and application flows
- Supported backend data handling using Supabase (managed database service)
- Worked with clearly defined data schemas and application logic
- Collaborated remotely following documented technical workflows

PROJECT

StockMinder | Bangkit Academy Capstone Project
Google Cloud Platform, Firebase, NodeJs, Python

- Built a cloud-based application using Google Cloud Platform and Firebase
- Worked with structured sales datasets and database connections
- Assisted in API development and cloud data flow between services
- Supported data-driven features for reporting and analysis

HiTeman Project | Laskar Ai Capstone Project
AI-based Mental Health Support System

- Contributed to the development of an AI-based mental health support application
- Assisted in organizing structured user input data and application flows
- Worked with predefined system logic and documentation
- Followed structured development and documentation processes within the project

FindScent — AWS Serverless Conversational Recommendation System
Cloud Computing Project | AWS (Lambda, API Gateway, DynamoDB, S3, Bedrock)

- Designed and deployed a serverless microservices architecture on AWS
- Managed structured session and conversation data using DynamoDB with TTL
- Implemented data integrity and normalization across conversation context
- Built cloud-based data flows between API Gateway, Lambda functions, and storage services
- Monitored system performance, logs, and costs using CloudWatch and AWS Budgets
- Optimized cloud resource usage to stay within free-tier limits while maintaining sub-2s latency

EDUCATION

Bachelor of Informatics Engineering
Ahmad Dahlan University (UAD)

GPA: **3.82**

Study Period: 3 years 10 months

2020 – 2024

Master of Information Technology
Gadjah Mada University (UGM)

2025 – 2026 (Expected)

RELEVANT COURSEWORK & CERTIFICATION

- Junior Network Administrator (JNA) – BNSP
- Google IT Support – Coursera
- Bangkit Academy – Cloud Computing Track
- Google Cloud Skill Boost
- Dicoding (Backend, Cloud, Programming Fundamentals)
- Codepolitan – Fullstack Class
- BuildWithAngga

SKILLS & OTHERS

- Web Programming : HTML, CSS, SQL, PHP, Laravel, JavaScript
- No-Code Tools : WordPress, Webflow, Wix
- Cloud Computing : Google Cloud Platform, AWS
- Design Tools : Figma, Canva
- Python, Cloud & Backend Fundamentals
- Management Tools : One Drive, Notion, Clickup
- Interest : Comedy, Games, Travelling, Technology, Design, Podcast
