AZAM AZRI AHMAD

Indonesia

(+62) 821-3407-4063 azamazrri@gmail.com

SUMMARY

Research-oriented professional with a Education background in Information Technology and hands-on experience in market research, data analysis, and research-driven product development. Skilled in translating complex data and qualitative insights into structured findings that support product, business, and strategic decision-making. Experienced in research across digital products, AI-assisted systems, and optimization problems.

PROJECT

StockMinder — Smart Stock Assistant
Case Study Project

- Conducted research on inventory mismanagement and food waste in small F&B businesses
- Performed market and competitor analysis of POS and inventory management solutions
- Analyzed sales behavior as time-series data to identify demand patterns
- Selected ARIMA forecasting based on data availability and interpretability
- Translated insights into automatic restocking recommendations
- Produced structured research findings to support product and technical decisions

HaiTeman — Mental Health Chatbot
Health-Tech Case Study

- Researched mental health accessibility challenges among young and urban users
- Reviewed ACT (Acceptance and Commitment Therapy) literature and digital mental health standards
- Designed emotional categorization for Indonesian text (happy, sadness, fear, stress)
- Evaluated the use of LLMs for empathetic response generation
- Translated research insights into chatbot interaction design

GIB Shortest Route — Distribution Logistic Route
Optimization Case Study

- Studied inefficiencies in manual route selection for distribution systems
- Conducted literature review on graph-based shortest-path algorithms
- Modeled distribution networks as weighted graphs
- Evaluated algorithm suitability based on efficiency and simplicity
- Developed a decision-support flow for optimal route selection

FindScent — Chatbot Recommendation Perfume
Domain Spesific Case Study

- Researched consumer decision-making in fragrance selection
- Identified key perfume attributes (notes, mood, occasion, personality)
- Designed structured conversational data collection
- Applied rule-based filtering and semantic matching for recommendations
- Utilized LLM-based interpretation for explainable chatbot responses

EDUCATION

Ahmad Dahlan University – (2020 - 2024)
Informatics Engineering graduate with a GPA of 3.82 and a study period of 3 years and 10 months
Gadjah Mada University – (2025 - 2026 (Expected Finished))
Master of Information Technology

SKILLS & OTHERS

Tools : Microsoft Word, Excel, Power Point, Teams, Visual Studio Code, Jupyter Notebook, Power BI, Google Workspace
Website : HTML, CSS, Javascript
Database : MySQL, Postgresql
Programming Language : Python
Editing : Canva, Nano Banana.
Languages : Indonesian and English
