Dear Hiring Committee,

I am writing to express my interest in the Intern position within the Collective Bargaining Department at the International Association of Fire Fighters (IAFF). I am currently pursuing a Master's degree in Information Technology and have a strong academic and project-based background in data analysis, document review, and structured data management.

Through my academic and independent research projects, I have gained hands-on experience analyzing complex documents, extracting relevant data points, and organizing both qualitative and quantitative information into structured datasets. I have worked with relational databases such as MySQL and PostgreSQL, and I am comfortable performing data entry, validation, and consistency checks to ensure accuracy and reliability.

My background includes research-driven projects involving document analysis, time-series data interpretation, and data-supported decision-making. These experiences have strengthened my attention to detail, ability to work with structured information, and understanding of how accurate data supports organizational and strategic needs—skills that closely align with the responsibilities of this internship.

I am particularly drawn to this opportunity because of IAFF's mission and the meaningful impact of collective bargaining work. I am eager to contribute my analytical skills, technical foundation, and strong work ethic to support the department's data management and research efforts.

Thank you for considering my application. I would welcome the opportunity to further discuss how my background and interests align with the needs of the Collective Bargaining Department.

Sincerely,
Azam Azri Ahmad
