UNIVERSITAS GADJAH MADA

Develop Trust in a Digitalized World

Pratikno

Yogyakarta, 23rd November 2017

No trust …. No show … !!!

No trust … no cross … !!!

No trust … no eat … !!

No trust … no fly… !!!

… TRUST is with us in our daily life …..

We notice TRUST as we notice AIR; only when it becomes scarce & polluted.

- We rely upon others
- We confidence upon others
- We are freed from worry
- We don’t need to monitor others
- We trust them
- We trust the system

Without trust, people must engage in self-protective actions and spend much more.

Trust to the government

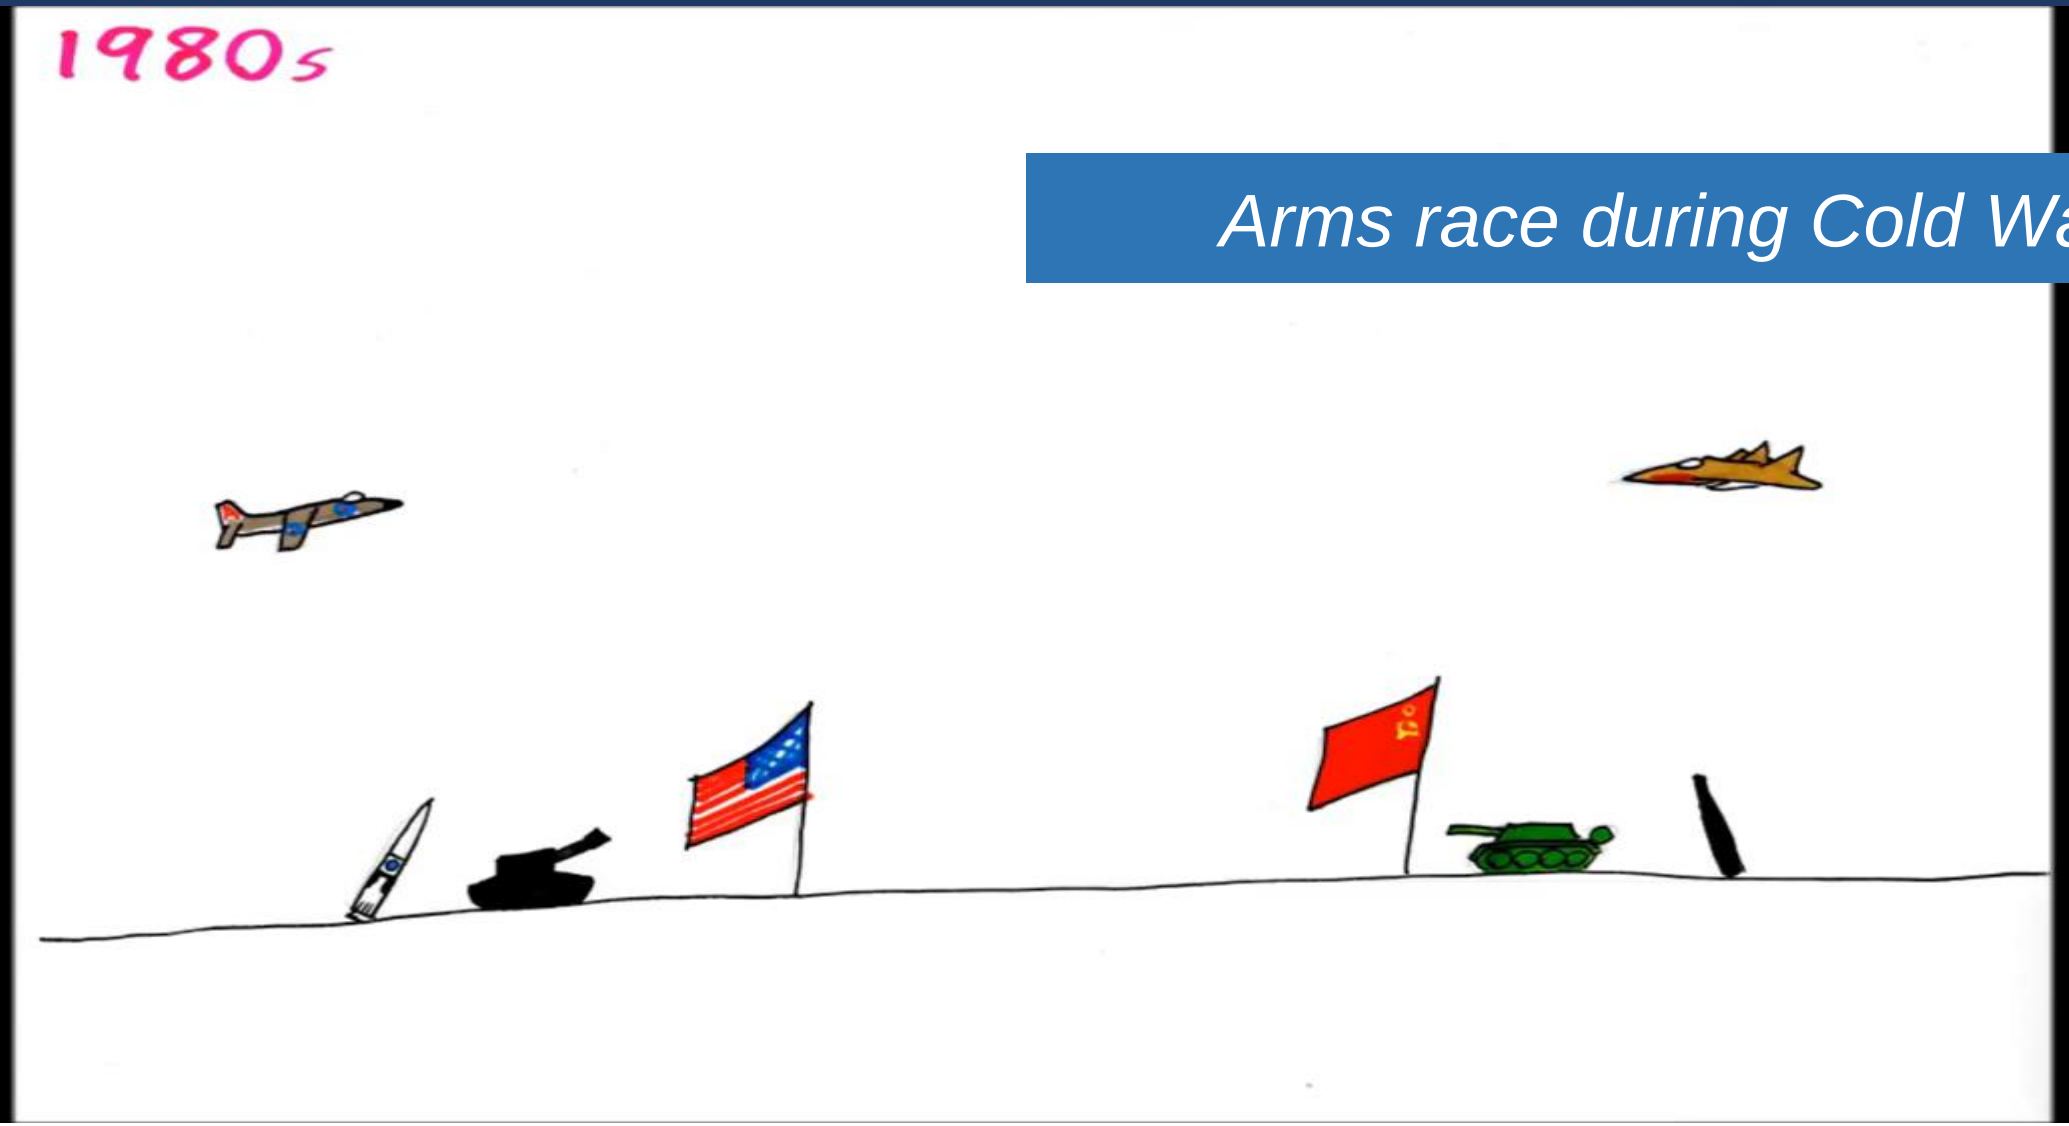

Distrust is costly

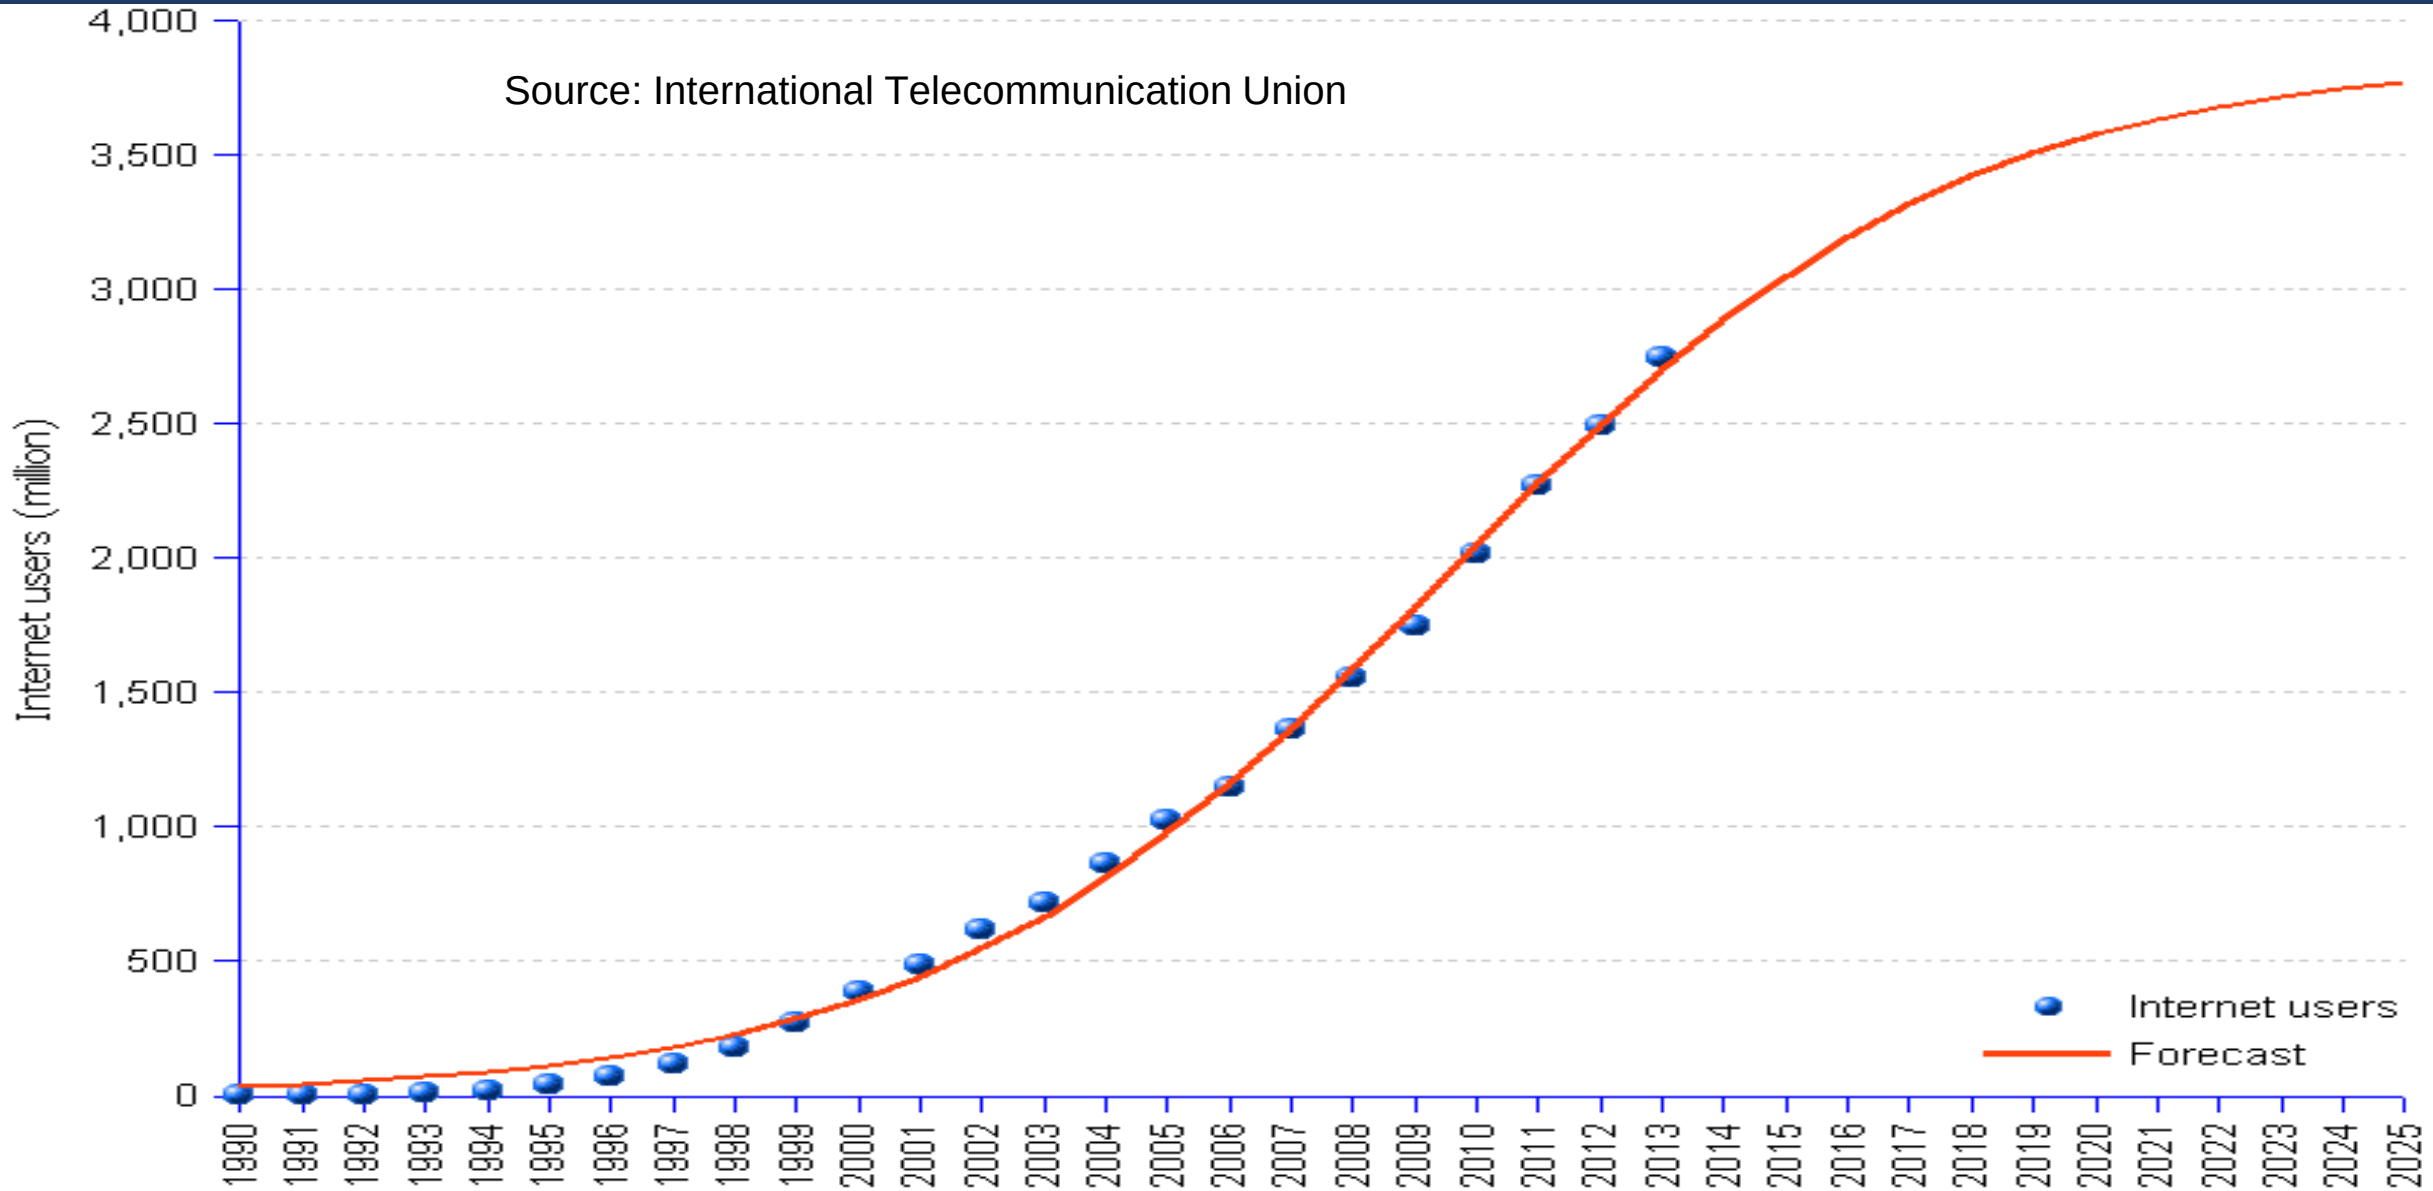

Distrust is very costly & risky

Arms race during Cold War

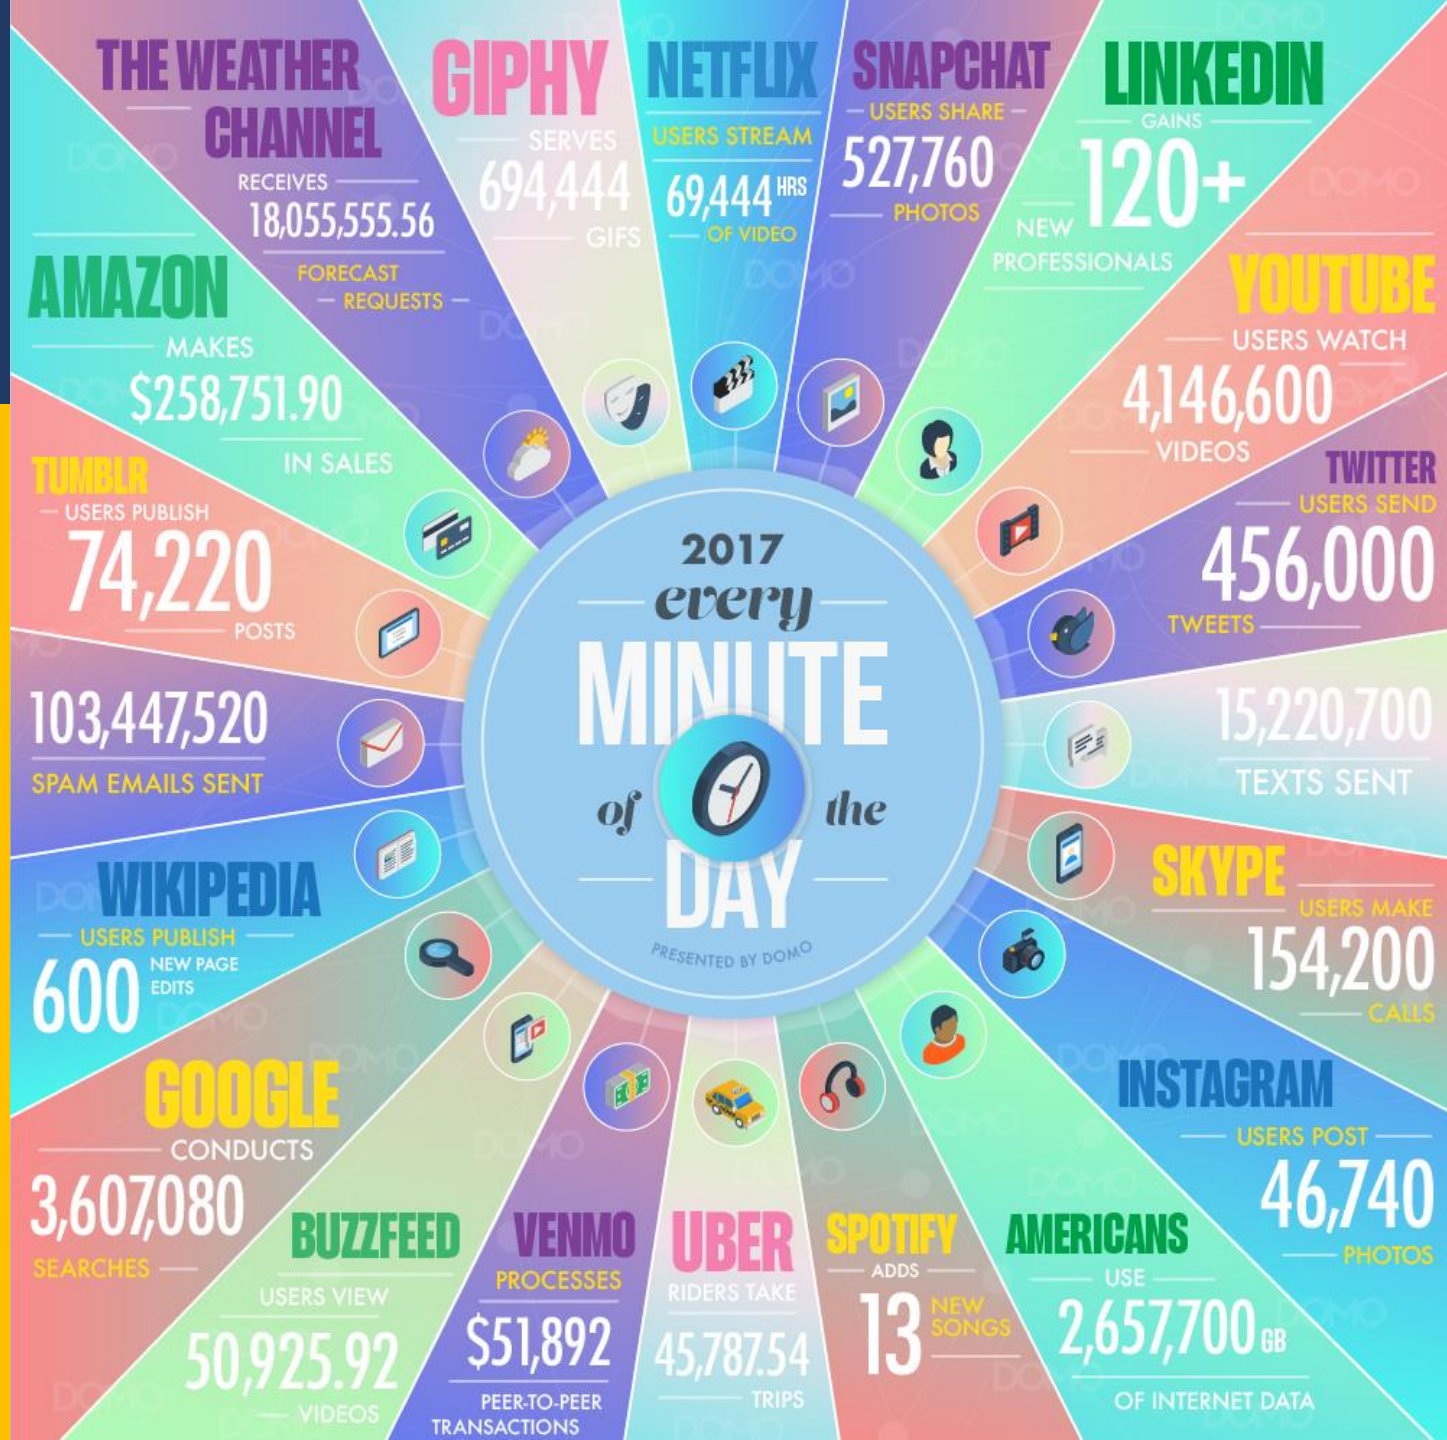

New Context: Digital connected world

Digital Connected World

Posting & sharing per minutes:

- 4,1 million people di Youtube
- 46 thousand photos in instagram
- 3,6 search in google
- 456 thousand in twitter

IT IS A DISRUPTION !!

- ❖ Digitalization
- ❖ Direct communication
- ❖ Globalization
- ❖ Virtual simulation
- ❖ Dis-intermediation
- ❖ Immediacy (real time)

efficiency *as well as* **discordance**

The big can easily become obsolete !

facebook

The biggest social media, does not produce content

UBER

The biggest taxi company, does not have cars

Alibaba.com®
Global trade starts here.™

The biggest retailer, does not have its own stocks

airbnb

The biggest accommodation service, does not have properties

Even Banking too !!

Indonesia initiatives ….

GO JEK

traveloka

ruangguru

nulisbuku.com
Publish your Dream

eFishery

BILDECO

Prediction of the (near) future:
It is even more disruptive ….

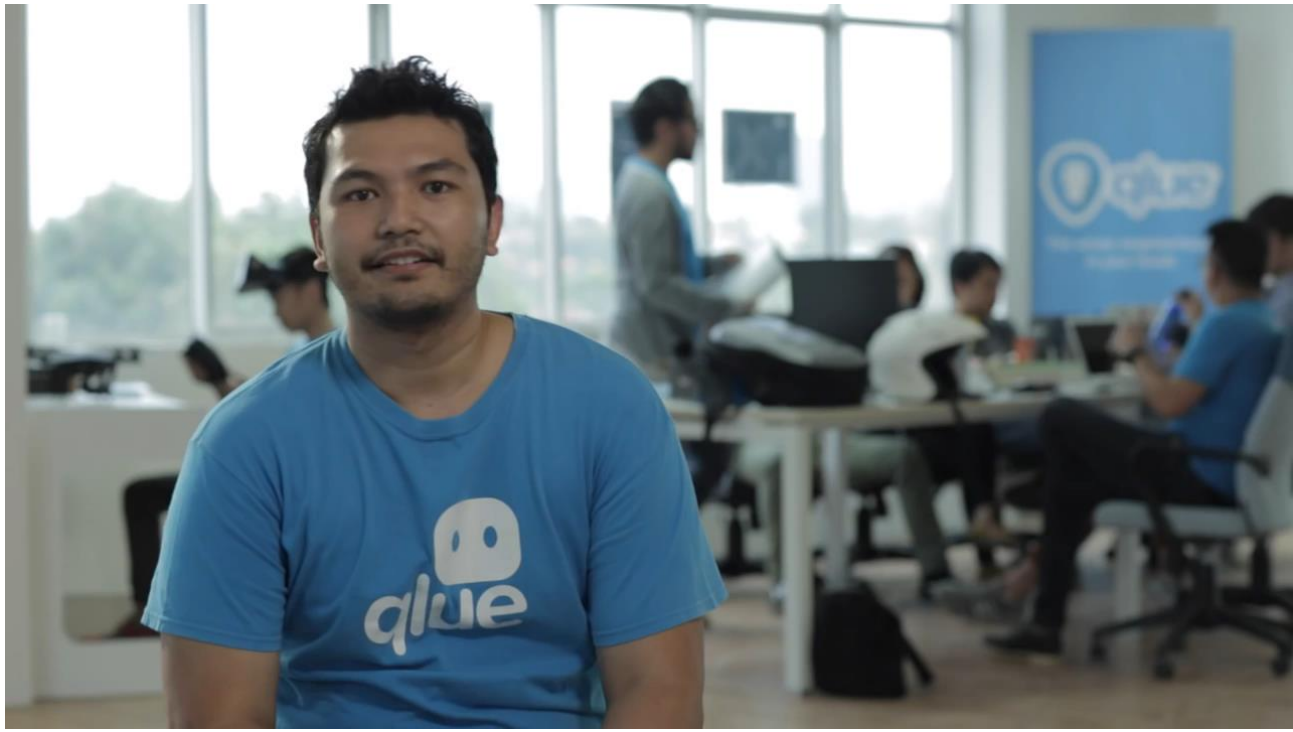

Do you want to make digital copy of your loved one?

It’s an April fools’ day …. But it can be real soon !!

Self-driving bike?

Qlue-Jek: drones delivery services?

It is a disruptive innovation !!

Huge benefit !!

Huge problems !!

Expand the creative disruption; disrupt the destructive one!!

Media without editors …

Approximately 800,000 of websites contain hoax, hate speech, or negative content (Kemenkominfo, 2017).

Radio

1.20%

E-mail

3.10%

Printed Media

5%

TV

8.70%

Writing

62.10 %

Websites

34.90%

Social Media

92.40%

Messaging apps
(whatsapp, line, telegram)

62.80%

Pictures

37.50 %

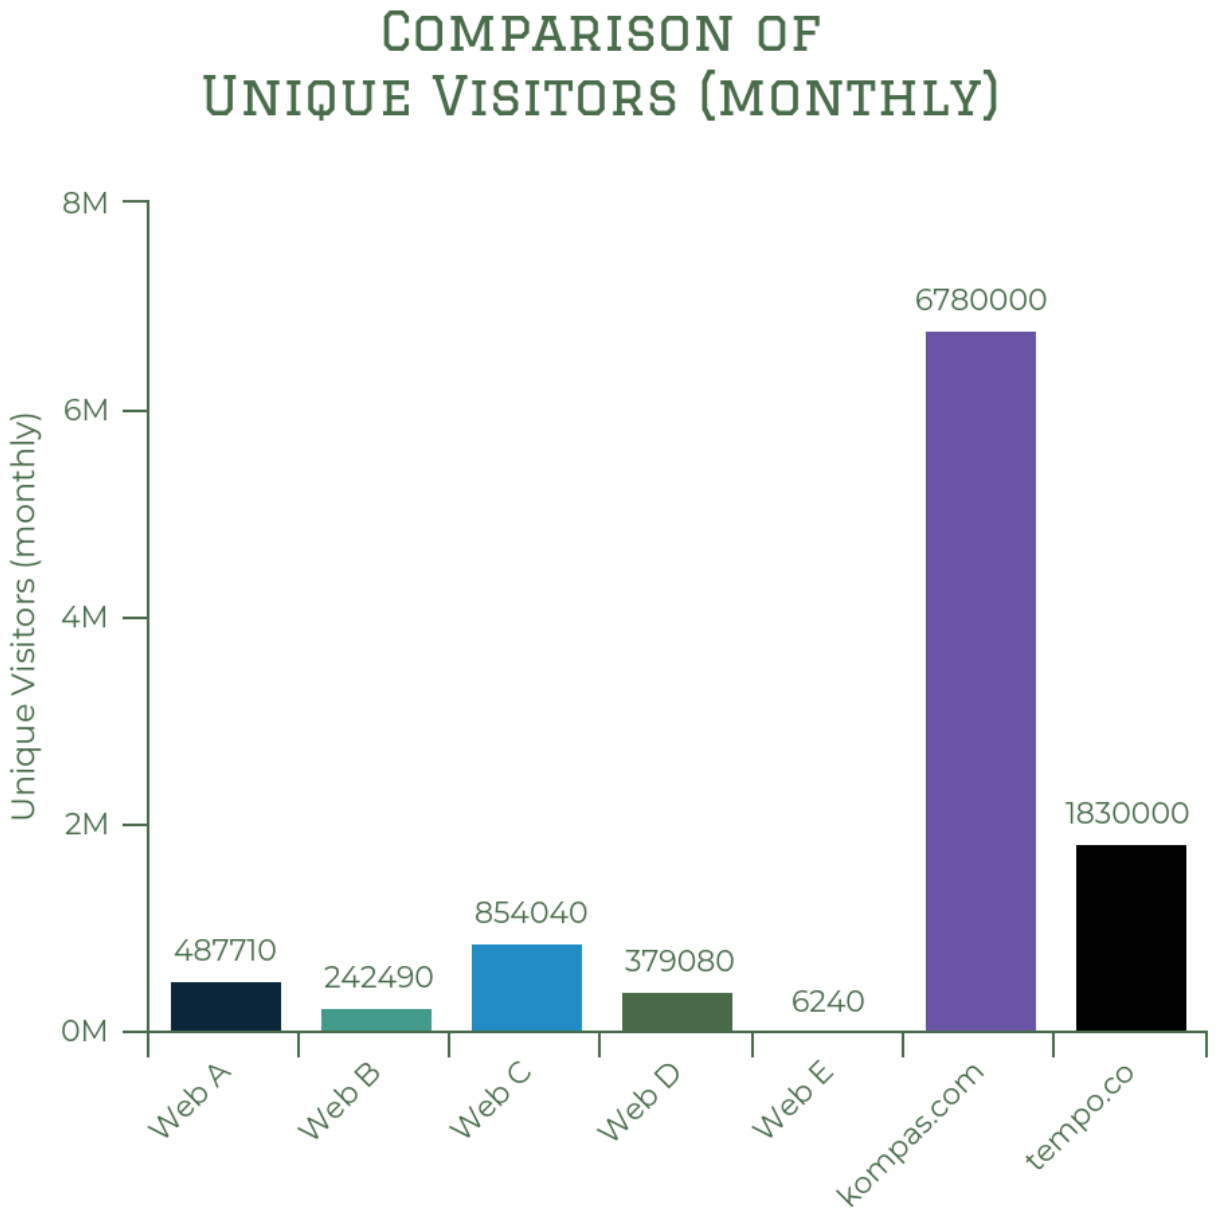

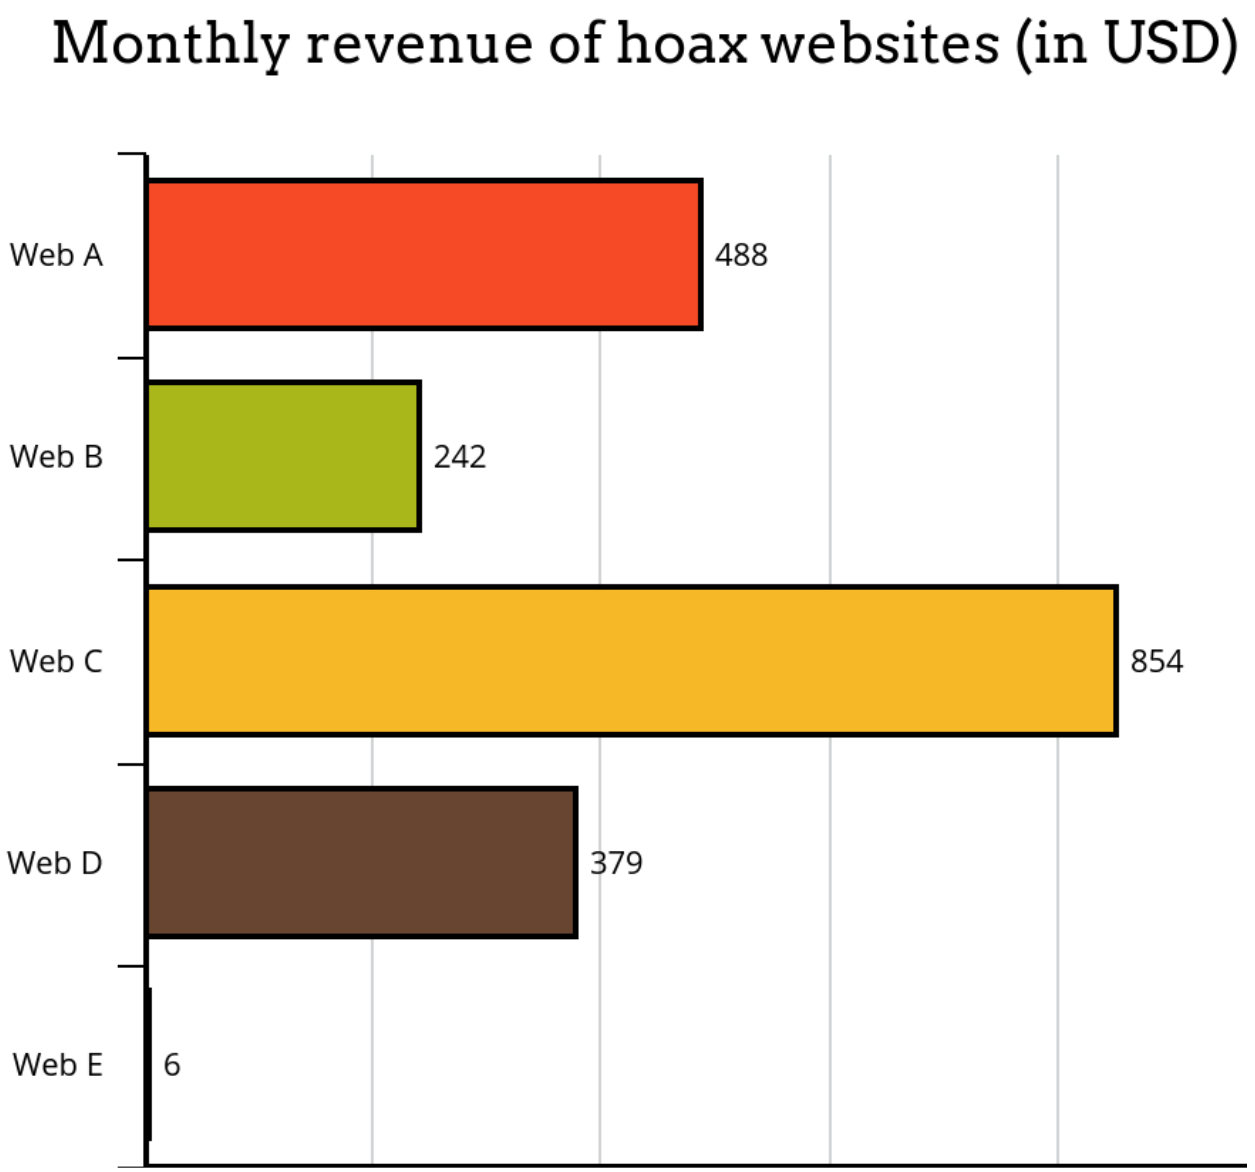

Videos

0.40 %

Facial expression manipulation using technology

Technology facilitates !!

Future's concern: battle drones….

Technology facilitates !!

To solve problems … Be Creative Disruptor !!

- ❖ Be creative innovator
- ❖ Out of the existing paradigm
- ❖ Seeing what no one else is seeing
- ❖ Doing what no one else is doing
- ❖ Connecting the unconnected
- ❖ Expecting creative accident

Setting the right framework:
Our Existing System of Democracy is now disrupted?

Massive hoax, fake news, new ways to campaign, & immediate issues & responses signify **the Deep Shift** of Democracy and Politics.

It is more than digital democracy.
It is a disruption.
It is **new democracy**

New Politics... New Democracy

- Digitization – everything goes digital. Discussion, narratives, debates, and even lies are shared and exchanged in digital realm.
- Providing online platform for socio-political activities: referenda, e-voting, e-polling.
- User generated content and web 2.0 (interactive real time).

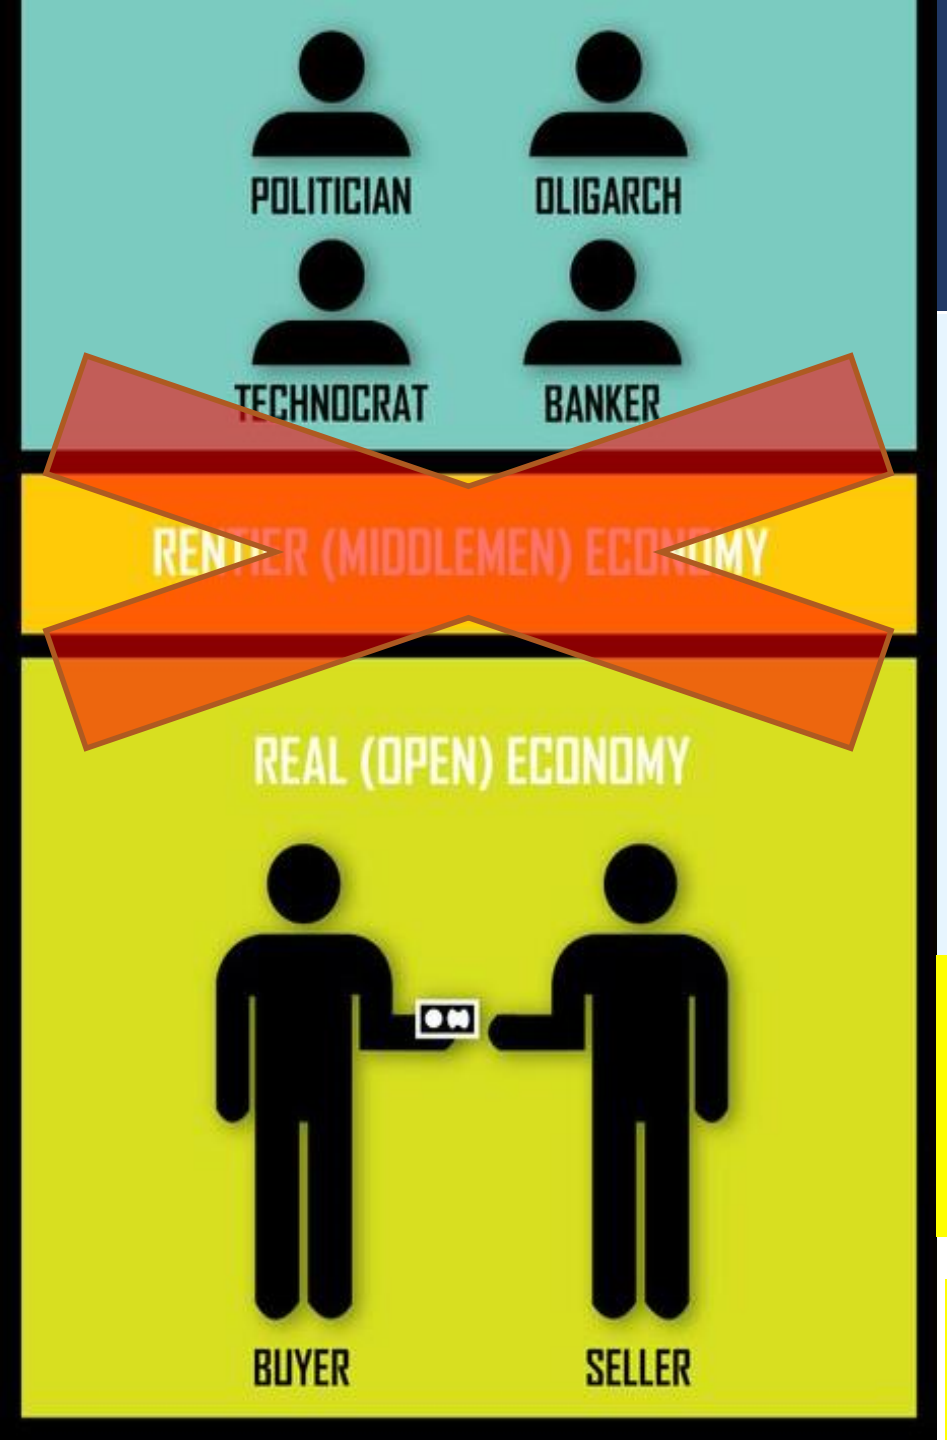

Characteristics of disruptive/ new democracy: Digital Prosumption....

Blurring roles:

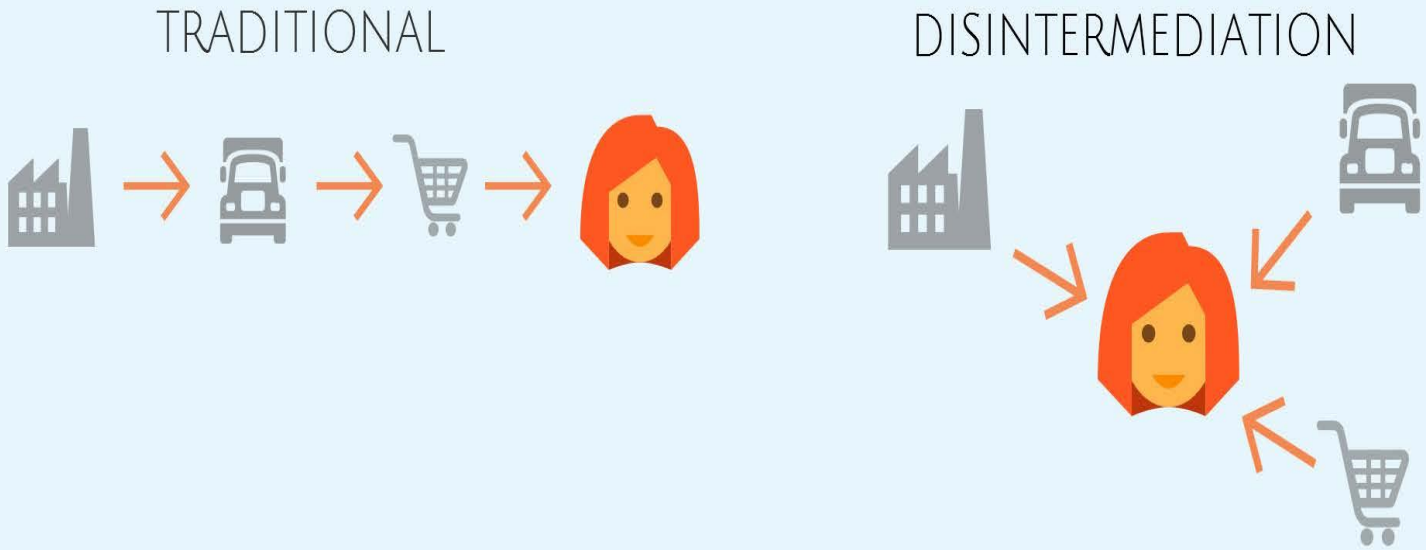

Everyone can be a producer and consumer....

SIMULTANEOUSLY

Dis-intermediation of Politics

Cutting the middle-men: political party, media, brokers !!

Big data & targeted campaign, … etc

Characteristics: Knowledge Politics...

"Who owns the information , owns the world", Rothschilds

Big data
Targeted campaign
Personalization
Anonymity

Immediateness of politics...

Setting the agenda now depends on **goes viral** and getting public attention through digital platform or not….

New Politics is emerging in Indonesia: Digital Petition

change.org

6 Kemenangan Petisi Online (2016)

goes viral in a matter of seconds....

LETS TAKE INITIATIVES through Digital Democracy --- Crafting more Digital Democrats

Collaborative Spirit/Effort

Digital Trust

Evidence Based Learning

Shifting Politics & Shared Politics

From People, by People, for People

Social Entrepreneurs through Education

Encouraging public initiatives to fight hoax…

Forum Anti Fitnah, Hasut, dan Hoax

Indonesian Hoaxes Community (IHC)

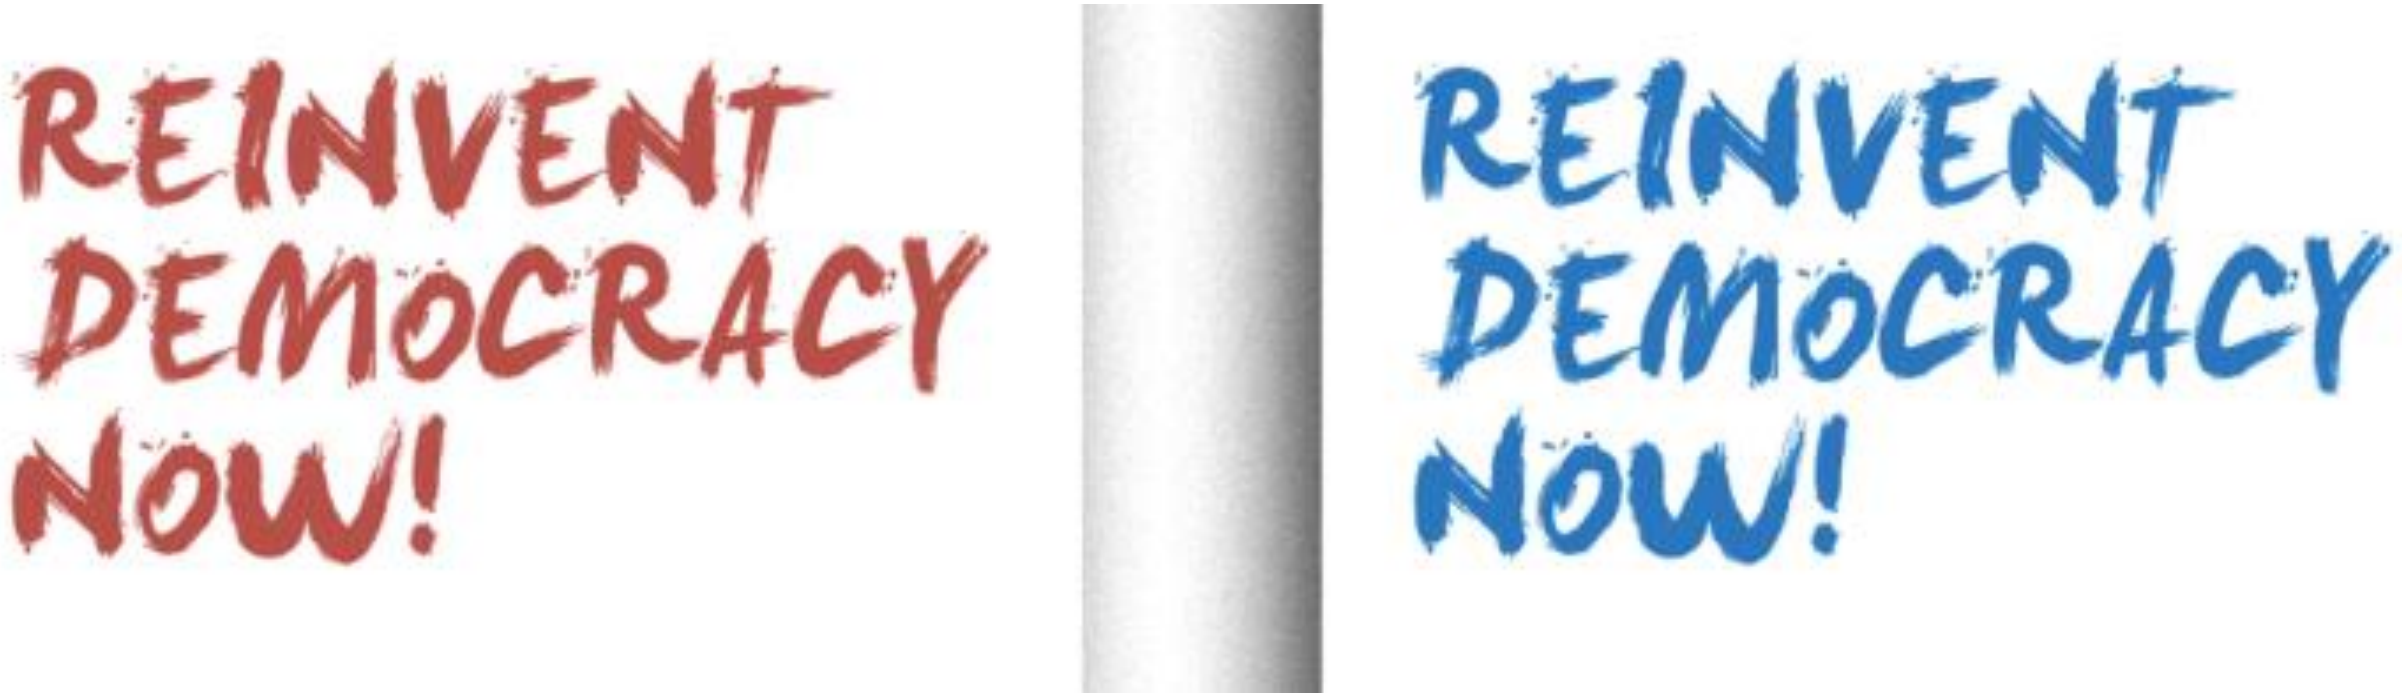

Media Anti Hoax

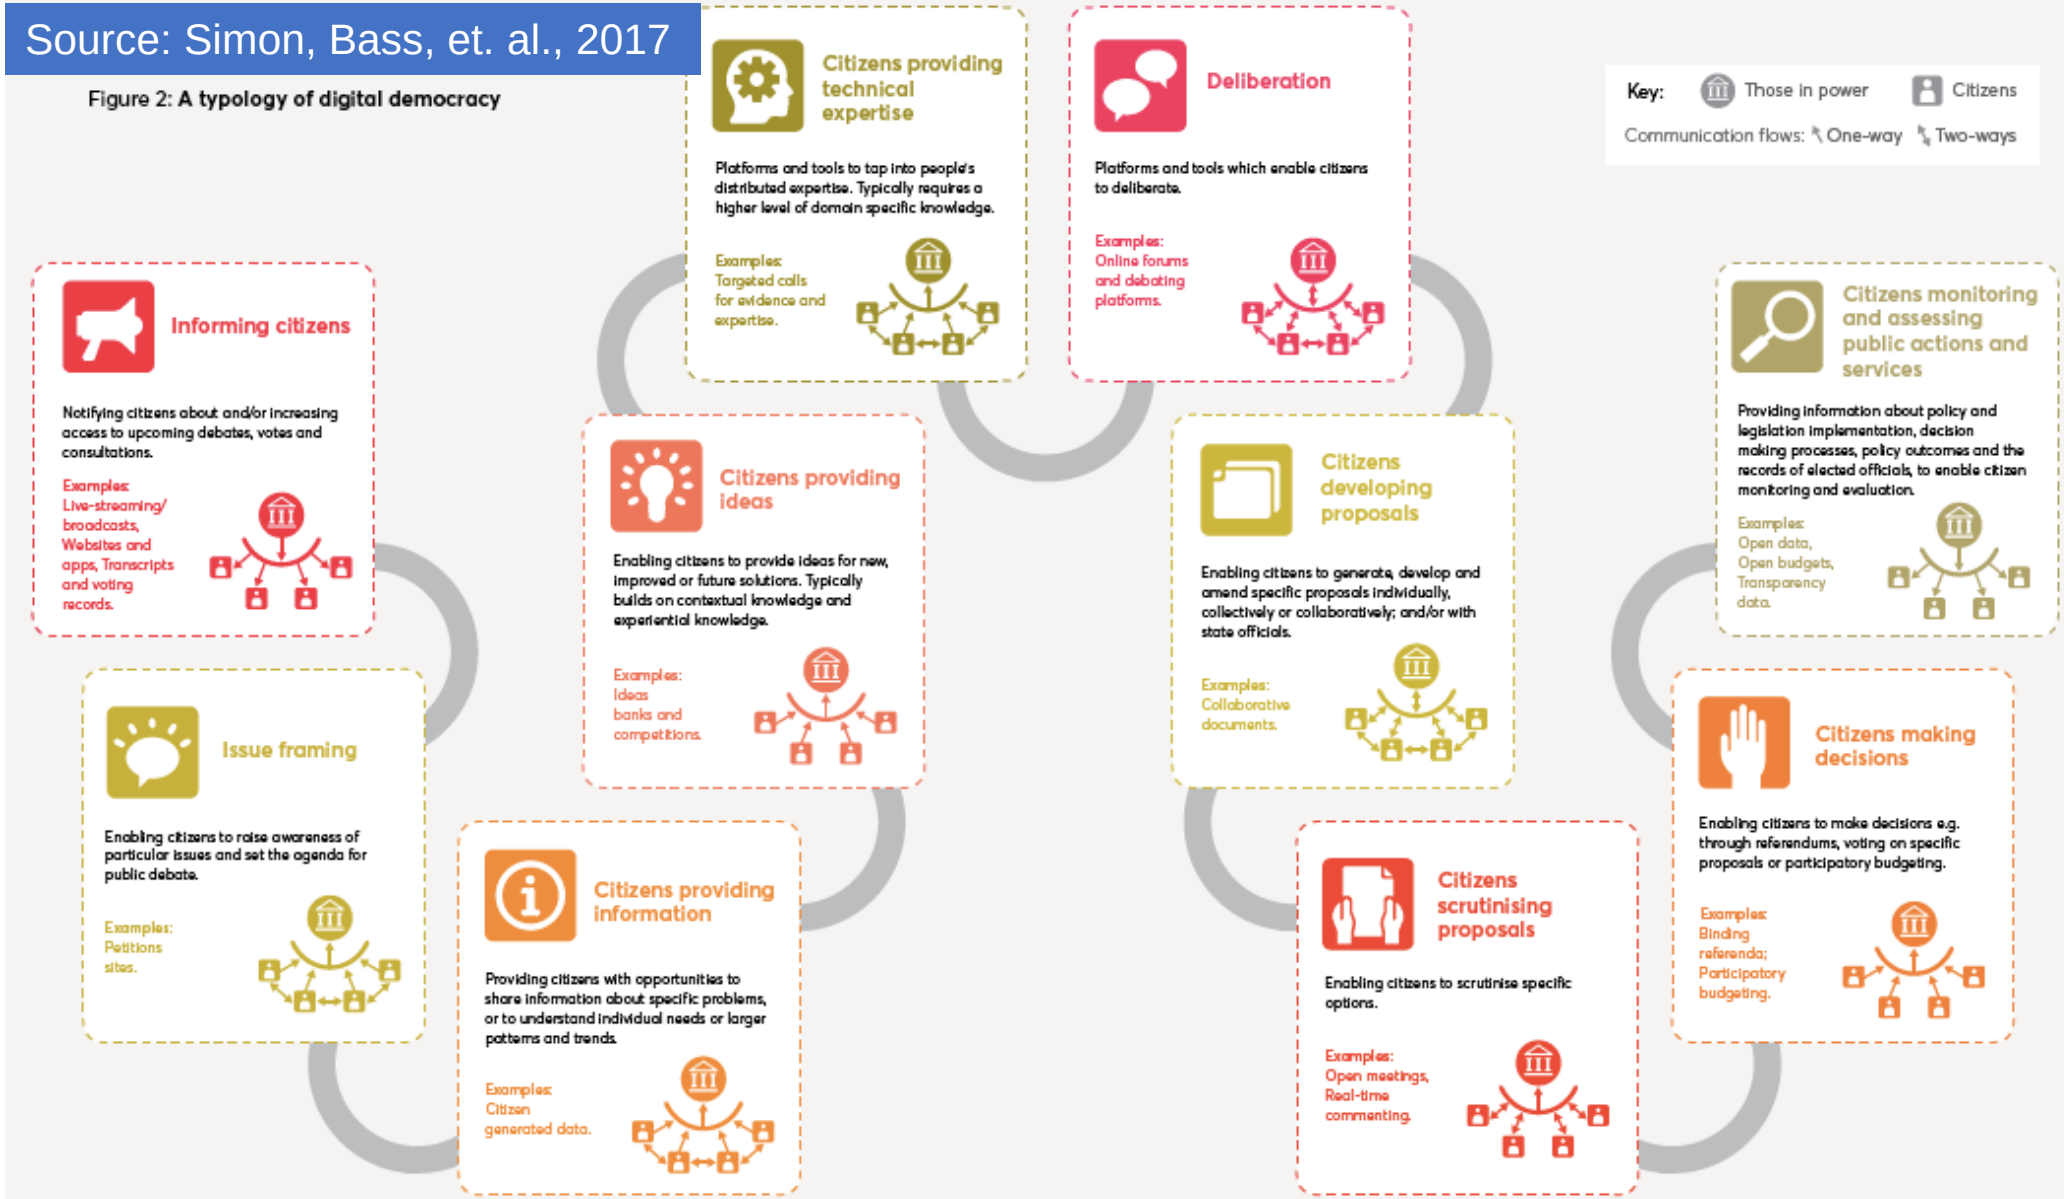

What's Next?

Crafting a new democracy ...

Figure 2: **A typology of digital democracy**

Crafting Digital Democracy in Disruptive Era...

1

Informing citizens

Notifying citizens about and/or increasing access to upcoming debates, votes and consultations.

Examples:
Live-streaming/ broadcasts, Websites and apps, Transcripts and voting records.

2

Issue framing

Enabling citizens to raise awareness of particular issues and set the agenda for public debate.

Examples:
Petitions sites.

Source: Simon, Bass, et. al., 2017

Crafting Digital Democracy in Disruptive Era...

3

Citizens providing information

Providing citizens with opportunities to share information about specific problems, or to understand individual needs or larger patterns and trends.

Examples:
Citizen generated data.

4

Citizens providing ideas

Enabling citizens to provide ideas for new, improved or future solutions. Typically builds on contextual knowledge and experiential knowledge.

Examples:
Ideas banks and competitions.

Source: Simon, Bass, et. al., 2017

Crafting Digital Democracy in Disruptive Era...

5

Citizens providing technical expertise

Platforms and tools to tap into people's distributed expertise. Typically requires a higher level of domain specific knowledge.

Examples:
Targeted calls for evidence and expertise.

6

Deliberation

Platforms and tools which enable citizens to deliberate.

Examples:
Online forums and debating platforms.

Source: Simon, Bass, et. al., 2017

Crafting Digital Democracy in Disruptive Era...

7

Citizens developing proposals

Enabling citizens to generate, develop and amend specific proposals individually, collectively or collaboratively; and/or with state officials.

Examples:
Collaborative documents.

8

Citizens scrutinising proposals

Enabling citizens to scrutinise specific options.

Examples:
Open meetings,
Real-time commenting.

Source: Simon, Bass, et. al., 2017

Crafting Digital Democracy in Disruptive Era...

9

Citizens making decisions

Enabling citizens to make decisions e.g. through referendums, voting on specific proposals or participatory budgeting.

Examples:
Binding referenda;
Participatory budgeting.

Citizens monitoring and assessing public actions and services

10

Providing information about policy and legislation implementation, decision making processes, policy outcomes and the records of elected officials, to enable citizen monitoring and evaluation.

Examples:
Open data,
Open budgets,
Transparency data.
